About us

OUR VISION

To be an indispensable **egg-based solutions leader** through relentless pursuit of sustainable production and innovative solutions.

SUSTAINABLE PRODUCTION

Our sustainability initiative rests on the principle that the **needs of the present** are met without compromising the **needs of the future**.

For that reason, we model our business around **sustainable agriculture** and key environmental initiatives.

As a company, we obsess about efficiency and aim to produce more food using fewer resources while reducing waste. We at Rembrandt Foods are looking toward the future with a forward-thinking initiative to **LIVE RESPONSIBLY**.

INNOVATIVE SOLUTIONS

Day in and day out, we focus our research on **nothing but the egg**. This allows us to devote 100% of our time and research to understanding it better than anyone else.

We translate that understanding into products and solutions that **optimize the full functionality of the egg**.

Our on-site test kitchen and lab are utilized to bring ideas to life.

Dried Eggs

Less storage space required • Longer shelf life • Transportation efficiencies • Reduced waste
